Public sample · grower identity and location removed. The original grower report is unchanged.

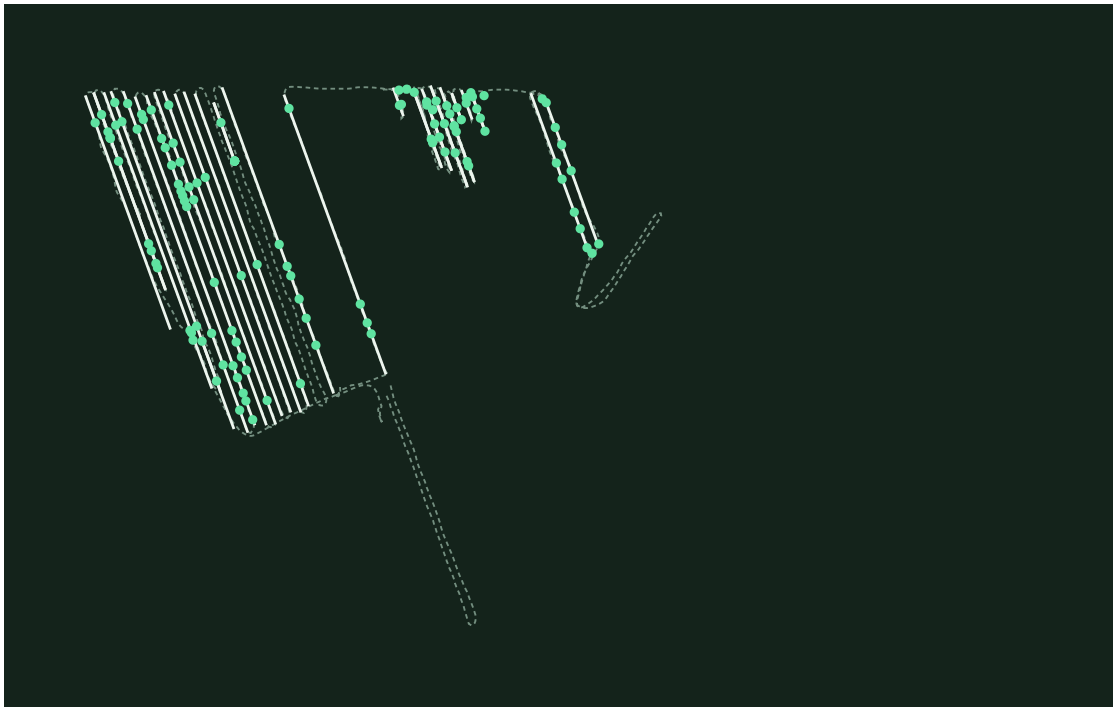

Ground Scouting Report

Public sample

SAMPLE	CROP	SCANNED
Orchard A	Apples	October 2026

25	2.46 km	119	4.3
ROWS SCANNED	OF ROW COVERED	MARKED BY OPERATOR	IN-ROW MARKS PER 100 M OF ROW

Map/Overview

Where to look first

Row	Marks	Per 100 m
Row 22	14	8.8
Row 06	10	10.5
Row 01	7	24.9
Row 13	7	15.3
Row 21	7	4.4

Rows 22, 06 and 01 hold 31 of the 106 marks in the rows (29%). 13 more are off the rows (see the map).

About this report

Operator marks	Locations marked by the operator during a cart pass.
Photos and boxes	Photos and mound boxes are retained from the generated source report. They are not a measure of model accuracy.
Location removed	The schematic preserves the relative row layout. Grower details, exact dates, aerial imagery and geographic coordinates have been removed. Row labels are anonymous. Row placement and distances are approximate.
Leads, not proof	Each mark is a spot to check on the ground, not a confirmed gopher or active burrow.
